Mentimeter.com

❑ Allows a free user to prepare, present and analyze presentations.

❑ It is a fun tool to engage the audience during a presentation.

❑ User can collect polls, get answers to quizzes, data and opinions from participants using smart devices.

❑ Every presentation gets a code, which when entered in the website by the participants, allows them to answer polls, quizzes or ask questions depending on the format of the presentation.

Mentimeter.com

There are several options that the presenter gets to choose from like:

- ❑ Multiple choice (with several chart formats to view the results)
- ❑ Word cloud (Example: can be used for brainstorming),
- ❑ Scales (Example: students can rate how they are feeling before and after the class)
- ❑ Open ended questions and responses
- ❑ Quizzes

Bitmoji app

- It is basically more than a personalized emoji.
- In Bitmoji -the users can create a cartoon version of themselves called the Avatar.
- You can sign up via your email.
- After downloading the app, the users can go through several screens customizing their avatar (hairstyle, eye color, nose shape etc).

Bitmoji app

- Using the Bitmoji keyboard, users can share their avatar and add more fun and color to their texts.
- It makes communication personalized and fun.
